Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants' method for preparing salts of hydroxy-substituted hydrocarbons or aromatic hydrocarbons (i.e., salts of bisphenol A) is unobvious over the prior art of record. Although the closes prior art of record (US Pat. 4,546,207) teaches a method for preparing salts of hydroxy-substituted (aromatic) hydrocarbons, comprising contacting a hydroxy-substituted (aromatic) hydrocarbon with a base (e.g., sodium hydroxide) in the presence of a solvent media, so as to form the salt followed by removing the solvent media before obtaining an anhydrous salt of the hydroxyl-substituted (aromatic) hydrocarbon, the prior art of record does not teach or suggest devolatilizing the solvent media by spraying the solvent media containing the salt product into a substantially water-immiscible organic solvent. Additionally, the prior art of record does not teach or suggest devolatilizing the solvent media containing the salt product by adding it to a substantially water-immiscible organic solvent (such as ortho-dichlorobenzene), utilizing the vessel as defined in the present claims 56 and 70, followed by reducing the particle size of the salt product. All claims (1-70) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
